AA:SF SPECIAL FORCES (OVERMATCH) V2.8.5

Posted: 24 APR 09, by Phoenix

AA:SF SPECIAL FORCES (OVERMATCH) V2.8.5 Listen up Soldiers. Headquarters has ordered us to re-deploy into key target areas as insurgent activity is once again escalating. Intelligence has reported an increase in IEDs in the areas, so you had better be careful. Remember your ES2 training and be sure to report any suspicious items to your Squad Leader.

We are proud to present another America's Army release. This release includes ES2 updates to four classic maps: SF Courtyard, SF Hospital, Urban Assault and Bridge Crossing. The maps have been updated with additional ES2 objects to discover and report. ES2 Bridge is an updated version of the popular Bridge Crossing map with new gameplay elements added such as ES2 objects with enhanced intelligence functionality. Players will be able to unlock access to a new path under the bridge and supply intelligence on enemy positions. We've also added improvements to the civilian AI within ES2 Border to have the AI react in a more realistic manner. Lock and load, it's time to go to work!

Head over to our SITREP section to find out all the new features in the upcoming release of America's Army: Special Forces (Overmatch) v2.8.5 now!
